

IronOrbit to Share Cloud Security and Compliance Insights at ACEC 2025 Fall Conference in San Diego

Anaheim, CA - Thursday August 24th - IronOrbit, a leader in secure, high-performance cloud desktops and managed IT services, will join the ACEC 2025 Fall Conference, October 5–8, in San Diego.

Building on its recent sponsorship of the ACEC IT Forum, where engineering leaders examined artificial intelligence, cybersecurity, and evolving compliance demands, IronOrbit will present strategies to help firms support secure remote work for dispersed teams while meeting the increasing requirements of NIST 800-171 and CMMC.

“This year’s event is equal parts informative and entertaining, featuring inspiring keynote speakers, timely education sessions, and unmatched networking. We’re excited to continue the dialogue from the IT Forum and show how AEC firms can strengthen security, embrace AI responsibly, and streamline operations.” said Kamron Naderkhani, Head of Marketing at IronOrbit.

IronOrbit will showcase advanced cybersecurity and compliance strategies with built-in safeguards and audit-ready visibility, high-performance cloud workspaces for BIM and CAD teams, and solutions that streamline secure remote work for geographically distributed teams.

About IronOrbit

IronOrbit delivers specialized cloud workspaces and Smart Managed IT services for AEC and other regulated industries. Recognized for three consecutive years in the Gartner® Magic Quadrant™ for Desktop as a Service (DaaS), IronOrbit combines GPU-accelerated INFINITY Workspaces, Smart Managed Services, and vCISO guidance to help organizations increase agility, strengthen security, and simplify compliance, backed by 24/7 U.S.-based support and six consecutive years of SOC 2 Type 2 certification.
