

IronOrbit Reflects on ACEC Fall Conference: Enabling the Future of AI-Driven, Secure, and Data-Powered AEC Firms

Wednesday, October 15th, 2025 – Anaheim, CA - IronOrbit extends its appreciation to the American Council of Engineering Companies (ACEC) and its members for another successful Fall Conference, where engineering and technology leaders united to shape the future of the AEC industry. It was a pleasure to reconnect with members and partners to explore how innovation continues to transform how firms design, collaborate, and deliver projects.

This year's event centered on the convergence of AI, data, and digital strategy, showcasing how forward-thinking AEC firms are reimagining business operations, decision-making, and client delivery through emerging technologies. Discussions highlighted the increasing need for firms to modernize their IT infrastructure, align technology with business strategy, and foster a culture that embraces intelligent tools to boost productivity and creativity.

As firms accelerate their adoption of AI and automation, secure, compliant, and high-performance computing environments have become critical foundations for growth. IronOrbit's INFINITY Workspaces™ empower AEC organizations to build AI-ready operations delivering GPU-accelerated cloud performance, SOC 2 Type 2 and NIST 800-171 compliance, and enterprise-grade security for everything from BIM and CAD workflows to generative design and predictive analytics.

"The conversations at ACEC reaffirmed what we see every day with our clients: AEC leaders are eager to leverage AI and data-driven insights, but need secure, scalable infrastructure to get there," said Robert Mourra, VP of Key Accounts at IronOrbit. *"Our purpose-built cloud ecosystem enables firms to innovate confidently, combining performance, compliance, and intelligence in one unified platform."*

IronOrbit remains dedicated to helping AEC firms unlock the power of data, embrace AI responsibly, and future-proof their operations through secure, intelligent, and compliant cloud solutions that enable true digital transformation.

About IronOrbit

IronOrbit is a specialized cloud provider delivering high-computing, compliant cloud desktops with enterprise-grade cybersecurity and a fortified security posture. Earlier this year, IronOrbit was chosen by one of Hawaii's largest banks as its technology partner of choice, reinforcing its leadership in Desktop-as-a-Service (DaaS) for secure, high-performance, and compliance-driven environments.
