

AI Is Reshaping AEC: IronOrbit to Engage Industry Leaders at 2026 ACEC Texas Annual Meeting

Thursday, March 5th, 2026 - IronOrbit, a managed service provider with over 25 years of experience and a recognized leader in Desktop as a Service (DaaS), today announced its sponsorship of the 2026 Annual Meeting hosted by the **American Council of Engineering Companies of Texas (ACEC Texas)**.

Artificial intelligence is rapidly reshaping how AEC firms design, collaborate, and deliver projects. From AI-assisted modeling to data-driven decision-making, engineering organizations are adopting more compute-intensive tools that demand modern, scalable IT infrastructure. ACEC Texas, representing more than 1,000 member firms statewide, brings together industry leaders to discuss innovation, workforce strategy, and the technology investments required to remain competitive.

At the event, IronOrbit will engage firm executives and IT leaders on the infrastructure challenges tied to AI adoption and increasingly complex BIM and CAD environments. As workloads grow and teams remain distributed, firms must balance performance, cybersecurity, compliance requirements, and cost predictability all without disrupting productivity.

IronOrbit's INFINITY Workspaces deliver private cloud Desktop-as-a-Service built for performance-intensive AEC applications and emerging AI workloads. The solution supports platforms such as AutoCAD, Revit, and Civil 3D and provides a secure, scalable infrastructure that meets modern engineering demands. IronOrbit has been recognized in the **Gartner® Magic Quadrant™ for Desktop as a Service for three consecutive years**, reflecting its continued focus on innovation, performance, and customer experience. The company also provides compliance-driven services aligned with SOC 2 Type 2, NIST 800-171, and CMMC standards, helping firms modernize securely.

"AI is transforming how engineering firms operate," said **Ayman Ayoub, Chief Commercial Officer at IronOrbit**. *"To fully leverage these advancements, firms need infrastructure designed for performance, security, and scalability. We're committed to helping AEC organizations modernize their IT environments, so they're prepared for the future."*

Attendees of the 2026 ACEC Texas Annual Meeting are encouraged to connect with the IronOrbit team to explore how AI-ready infrastructure can improve performance, strengthen security posture, and support long-term growth.
