IronOrbit | KEEPER

KEEPER BUSINESS PASSWORD MANAGER

IronOrbit presents Keeper Business Password Manager

The eruption of the hybrid workforce only increases the need to ensure all protections and defense strategies are airtight. Having strong passwords provides the first line of defense against unauthorized access to your computer and your information. Maintaining strong passwords for all your accounts, professional and personal, is important, but remembering them all can be a problem.

Keeper eliminates the pain of having to remember passwords while protecting your business from password-related cyber threats.

Keeper is a zero-knowledge platform which means that all your passwords and private information is encrypted locally on your device and protected by 256-bit AES encryption keys. Clients select a strong master password used only for Keeper. Then they are prompted for Two-Factor Authentication, and then the contents of their vault are decrypted. **Keeper is a highly secure and intuitive way to manage your passwords in one neatly organized easy-to-access vault.**

7 REASONS to Use Keeper

The Ultimate Protection Against Password-Related Data Breaches & Cyberthreats. Protect your environment at its entry points by improving password security.

1. Generate Strong Passwords on the Fly

2. Autofill Passwords

3. Access and sync passwords on multiple devices

4. Protect & manage unlimited passwords in your own private cyber vault

5. Login with fingerprint or facial recognition

6. Lock important files, photos, & videos in your secure vault

7. Securely share passwords and logins
