

# IronOrbit Exhibits at the Nation's Largest Design & Manufacturing Expo

## Innovative Technology Provider Is on a Mission to Help Modernize US Manufacturing

**Monday, April 11, 2022, Anaheim Hills, CA** - IronOrbit, ICT powerhouse and Gartner recognized Managed DaaS provider, will be exhibiting at Design & Manufacturing (D&M) West expo from April 12-14, located at the Anaheim Convention Center. The country's leading advanced design and manufacturing event will give IronOrbit the opportunity to meet with manufacturers who want to benefit from Industry 4.0.

Industry 4.0 refers to the fourth industrial revolution and asserts the belief that traditional factories and warehouses will no longer compete because they're too slow and cumbersome. Technology adoption can be a game-changer and allows manufacturers to revolutionize their business operations. The industry's future depends on investing in big ideas that leverage smart manufacturing tools to solve complex problems that continuously arise. Manufacturers need to modernize their infrastructure and it begins with moving to a cloud environment that fits their unique needs.

*"This is an exciting year for the manufacturing industry,"* says Marketing Manager, Kamron Naderkhani. *"Decisions companies make this year will have a lasting impact. US manufacturing was the envy of the world at one time. To reclaim that title, manufacturers need to fast-track Industry 4.0 which will modernize production. IronOrbit is eager to help them accomplish that goal as quickly and cost-effectively as possible."*

*"The D&M West,"* said Adrienne Zepeda, Group Event Director, IME West, *"offers an array of educational content. It's an event that helps exhibitors and attendees to progress the advanced technologies that address the widespread disruption impeding growth."*

Finding the right technology partners is essential for successful Industry 4.0. It is a strategic investment with multiple impactful benefits:

- Increased supply chain resilience
- Streamlined production
- Operational efficiency
- Onshoring/Reshoring production

Industry 4.0 technology can optimize resources and operational processes to create state-of-the-art factories for long-term success.

**IronOrbit** is a specialized cloud service leader focused on planning, deploying, and fueling digital transformations. Previous exhibits include this year's (NCSEA) structural Engineering Summit and the 2022 New York Build Expo. The company innovates, develops, and produces comprehensive technology solutions addressing modern businesses' biggest IT-related challenges. **Learn more at [www.ironorbit.com](http://www.ironorbit.com)**
