

2022 ACEC NATIONAL CONVENTION Confirms GPU-Accelerated Cloud Provider Can Help AEC Firms Meet Challenges

IronOrbit's GPU-Based Cloud Services Deliver Superior Performance and Collaboration

Friday, June 3rd, 2022 - Anaheim Hills, CA - IronOrbit, a specialized Cloud Service Leader providing GPU-Accelerated Hosted Desktops, has just exhibited at the annual ACEC National Convention & Legislative Summit from May 22-25 in Washington, D.C.

The ACEC National Convention provides networking between member firms, industry leaders, and technology providers. Deepening this connection between these groups is essential to overcome the challenges in 2022 and beyond. With hybrid workforces becoming the norm, one of the most pressing topics was the challenges of adapting to a hybrid work environment.

- Latency & limited bandwidth negatively impact user experience and impede productivity
- Mounting costs of on-premises hardware, as well as reduced scalability & modularity
- Need for multiple solutions to address collaboration, cybersecurity, and all IT needs
- Compelling need for digital transformation and future-proof solutions

The future of the AEC industry is all about communication and collaboration. Many visitors expressed keen interest in solutions that can help project teams be effective under any circumstances, regardless of the work environment. IronOrbit offers comprehensive ICT solutions that deliver robust communication and collaboration tools. Their turnkey Managed DaaS INFINITY Workspaces offer enhanced user experience, scalability, and security within a budget-friendly pricing model.

"What was an afterthought in the minds of IT leaders is now on the forefront," said Kamron Naderkhani— Marketing Manager. *"We see the adoption of cloud-first strategies by AEC firms across the country. Firms realize that moving to the cloud is necessary for their digital transformation. IronOrbit's subject matter experts coupled with our GPU-Accelerated INFINITY Workspaces are a perfect catalyst for starting this journey."*

The American Council of Engineering Companies (ACEC) is the business association of the nation's engineering industry. Founded in 1909, ACEC is a national federation of 52 state and regional organizations representing more than 5,500 engineering firms and 600,000+ engineers, surveyors, architects, and other specialists nationwide. ACEC member firms drive the design of America's infrastructure and built environment.

IronOrbit, a specialized cloud service leader, focuses on planning, deploying, and fueling digital transformations across multiple industries. The company innovates, develops, and produces comprehensive technology solutions addressing modern businesses' biggest IT-related challenges. Learn more at <https://www.ironorbit.com/case-studies/>
