

IronOrbit Leads the Way with GPU-Accelerated Cloud Desktops at ACEC Fall Conference

INFINITY Workspaces Deliver Collaboration & Connectivity to Drive Digital Transformation

Sunday, October 16th, 2022 - Anaheim Hills, CA - IronOrbit, a fully integrated ICT powerhouse and ACEC member, will participate in the National American Council of Engineering Companies (ACEC) Fall Conference. The event takes place from October 16-19, 2022, at the Broadmoor Colorado Springs, CO, and will center on the passage of the \$1.2 trillion Infrastructure Investment and Jobs Act.

The organization's signature event, the Fall Conference, is expecting the largest turnout in ACEC history. The infrastructure bill has lit the fuse for what promises to be a golden age of civil engineering and construction. This will increase competition in a rapidly growing industry that will require firms to maintain a competitive edge. Having the right technology can mean winning a multi-million-dollar contract.

IronOrbit's cloud-based solutions offer firms a distinct advantage by delivering cloud-based GPU-accelerated workspaces that boost real-time collaboration and promote design modeling and rendering. Project collaboration is streamlined with centralized data, secure file sharing, and optimized video conferencing. Their flagship cloud desktops, INFINITY Workspaces, provide project teams with GPU-accelerated performance anytime, anywhere, from any device.

Ayman Ayoub — VP of Sales & Marketing, said, *"Companies are looking for ways to be more resilient and agile. Digital technologies are offering great ways to achieve those objectives. We wanted to present information to the AEC community that could help them advance and thrive in the coming years. Technology plays an important role. People are realizing the benefits of digital transformation and see more clearly how it can pave the way for future success."*

The AEC industry is steadily embracing the benefits of cloud technology, collaboration, and data management solutions. IronOrbit continues to guide AEC firms through digital transformation with industry leading technology that drives innovation and sustainability.

ACEC was founded in 1906 and is the oldest and most significant business association of engineering companies. It is a national federation of 52 states and regional organizations representing over 5,000 engineering firms and over 560,000 engineers, surveyors, architects, and other specialists nationwide. ACEC member firms drive the design of America's Infrastructure and built environment.

IronOrbit, a member of ACEC, operates its global footprint of private data centers across more than twenty regions worldwide. SOC 2, Type 2 Certified, Tier certified facilities provide highly secure cloud services and virtual workspaces to thousands of customers, including the US government.
