

IronOrbit Brings the Future of Work Environments to ACEC Annual Convention

Friday, May 19th, 2023 - Anaheim Hills, CA - IronOrbit, a leading provider of GPU-accelerated cloud desktops, announces its participation at the [American Council of Engineering Companies \(ACEC\) Annual Convention and Legislative Summit](#), which will be held in Washington, DC from June 11 to the 14th, 2023. IronOrbit will be exhibiting at booth #6, where attendees can learn more about cloud computing solutions explicitly designed for the unique challenges of engineering firms.

Sixteen hundred attendees, made chiefly of C-level executives representing 78% of the ENR 500 top design firms, will gather in Washington, DC, to discuss key industry issues. Top on the agenda will be handling the industry's ongoing workforce challenges, including the remote/hybrid work model. Engineering firms require innovative solutions to maintain productivity and collaboration as the future of work continues to evolve.

IronOrbit's GPU Accelerated **INFINITY Workspaces** is a cloud-based solution that facilitates remote and hybrid work environments. It provides access to a secure and fully managed virtual Windows workspace from any location and device. With **INFINITY Workspaces**, engineering firms can reduce office space costs, attract top talent, and increase overall productivity while maintaining the highest security and data protection levels.

"IronOrbit is proud to bring our industry-leading cloud solutions to the ACEC National Convention," said Ayman Ayoub, Chief Commercial Officer "Our team understands the unique challenges engineering firms face in today's digital landscape, and we're committed to providing solutions that drive growth, resiliency, and value for our clients."

The American Council of Engineering Companies (ACEC) is the business association of the nation's engineering industry. Founded in 1909, ACEC is a national federation of 52 state and regional organizations representing more than 5,500 engineering firms and 600,000+ engineers, surveyors, architects, and other specialists nationwide. ACEC member firms drive the design of America's infrastructure and built environment.

IronOrbit offers state-of-the-art cloud solutions built on industry-leading NVIDIA GPU RTX technology and AI-enabled security to help businesses modernize operations and increase productivity and scalability. IronOrbit's cloud solutions are trusted by leading engineering firms to provide their employees with a secure, reliable, and efficient remote and hybrid work environment.
