

AIA Conference Calls for Enhanced Collaboration and Optimized End-User Experience

Thursday, June 29th, 2023 - Anaheim Hills, CA - IronOrbit, a leading innovator of cloud-based IT solutions, recently showcased its cutting-edge technologies at the American Institute of Architects (AIA) conference. The event, one of the largest of its kind, was attended by professionals worldwide from the Architecture, Engineering, and Construction (AEC) industry.

Attending the AIA conference for the first time, IronOrbit gained invaluable industry insights, pinpointing the primary concerns voiced by attendees:

- Flexibility in collaboration
- Streamlining the sharing of large files
- Ensuring optimal end-user experiences on cloud desktops

Smaller AEC firms indicated the need to work from anywhere, including international offices. This often presents difficulties with poor performance and sluggish response times. IronOrbit emphasized its GPU-Accelerated INFINITY Workspaces addresses these pain points through in-depth discussions and demonstrations. The turnkey solution collaboration delivers collaboration in real-time, centralized data repositories for effective sharing, and custom curated workspaces for each user profile.

"We were thrilled to have participated in the AIA conference and had the opportunity to engage with professionals from the AEC industry," said IronOrbit Marketing Manager Kamron Naderkhani. *"It's great to hear, first-hand, how well our cloud-based solutions meet the modern needs of AEC firms. IronOrbit INFINITY Workspaces empower companies to fully embrace flexible collaboration, effortlessly tackle large file challenges, and deliver exceptional end-user experiences to their teams, no matter where they are."*

AIA - Founded in 1857, AIA consistently works to create more valuable, healthy, secure, and sustainable buildings, neighborhoods, and communities. Through more than 200 international, state, and local chapters, AIA advocates for public policies that promote economic vitality and general well-being. Members adhere to a code of ethics and conduct to ensure the highest professional standards.

IronOrbit - As a Gartner-recognized GPU-Accelerated DaaS provider, the company delivers secure and scalable IT infrastructure to businesses across various industries. The company's focus on performance, reliability, and security makes it ideal for the different use cases required by the AEC industry. By leveraging the power of the cloud, IronOrbit empowers businesses to thrive in today's fast-paced and highly competitive landscape. Learn more about [IronOrbit INFINITY Workspaces](#).
