

IronOrbit Returns to the Prestigious 2024 California ACEC Engineering Excellence Awards

Tuesday, February 27th, 2024 - IronOrbit, a niche provider of Managed Desktop-as-a-Service (DaaS) for the Architecture, Engineering, and Construction (AEC) industry, proudly announces its sponsorship of the 2024 ACEC of California's Engineering Excellence Awards (EEA). The EEA is a prestigious annual event honoring the most remarkable achievements and individuals in engineering and design. For the second consecutive year, IronOrbit is reaffirming its steadfast commitment to helping AEC companies overcome challenges by delivering intricately tailored IT solutions.

IronOrbit's partnership with ACEC California strategically aims to utilize state-of-the-art technology to meet the unique demands faced by member firms. With cybersecurity's ever-changing landscape, IronOrbit is augmenting their offerings to align with the stringent standards of the Cybersecurity Maturity Model Certification 2.0 (CMMC). They offer consultative services on the certification process, enabling AEC firms to complete annual self-assessments. IronOrbit will also deliver secure and compliant IT Infrastructure to obtain third-party certification for Level 2 & NIST SP 800-171 requirements.

"At IronOrbit, we understand the critical role that security & compliance play in the engineering industry," said James Elliott, Chief Information Security Officer at IronOrbit. *"Our participation in this event is a testament to our commitment to provide ACEC member firms with robust, secure, and innovative IT services and infrastructure. We are excited to connect with industry leaders, share insights, and explore new opportunities to support the AEC community."*

IronOrbit's exhibit is set to be a focal point, where it will unveil its most recent innovations, including revamped cloud solutions, wide-ranging security and compliance services, and bespoke IT infrastructure designs. A highlight is the integration of Autodesk Revit for cloud-based design collaboration, bolstered by advanced rendering capabilities, ensuring high-fidelity visualizations and real-time collaboration. These solutions are meticulously devised to cater to the soaring performance requisites and complex security constraints of engineering firms. IronOrbit strives to optimize the customer experience and success by amplifying productivity, facilitating real-time collaboration, and authorized, on-demand access while ensuring the utmost protection of critical data.

IronOrbit's participation in these ACEC events continues to strengthen their reciprocal relationship, as well as knowledge sharing of the distinct needs and shifting market demands. This dedication has led to delivering exceptional IT services and sustainable solutions that support engineering professionals across California and beyond. The 2024 California ACEC Engineering Excellence Awards is an excellent platform for IronOrbit to forge meaningful connections within the engineering industry and demonstrate its expertise.

About IronOrbit

IronOrbit is a premier ICT services and solutions provider specializing in customized IT cloud infrastructure, GPU-Accelerated cloud desktops, security & compliance solutions, and smart managed services. With a focus on innovation and customer experience, IronOrbit is committed to empowering businesses across major industries and verticals plan, including AEC, to achieve their full potential by address some of the biggest technological challenges of modern business.
