

IronOrbit Expands vCISO Services to Meet Growing Demand for Cybersecurity Solutions

Monday, March 17th – Anaheim, CA – IronOrbit, a leading provider of cloud-based IT solutions and a SOC 2 Type 2 compliant organization, is proud to announce the expansion of its **Virtual Chief Information Security Officer (vCISO)** services. This expansion comes in response to the rising demand for robust cybersecurity solutions, as businesses face increasingly complex and persistent cyber threats.

As cyberattacks continue to escalate in frequency and sophistication, organizations across all industries are prioritizing security more than ever. Small and mid-sized businesses (SMBs) and enterprises alike recognize the need for expert cybersecurity leadership, but often struggle to find and afford dedicated in-house security executives. IronOrbit's vCISO services provide a cost-effective and scalable alternative, delivering expert guidance, risk assessment, compliance management, and threat mitigation tailored to each organization's unique needs.

"Our clients face an evolving threat landscape that requires proactive and strategic security measures," said James Elliott, Chief Information Security Officer (CISO) at IronOrbit. "With our team based expanded vCISO (virtual CISO) offerings, we are empowering businesses with enterprise-grade security expertise, ensuring they remain compliant, secure, and resilient against today's cyber threats."

IronOrbit's SOC 2 Type 2 compliance underscores its commitment to the highest standards of security, confidentiality, and data protection. This expansion of vCISO services enhances IronOrbit's comprehensive security suite, reinforcing its position as a trusted cybersecurity partner for organizations looking to safeguard their digital assets.

As cybercrime continues to grow, businesses can no longer afford to take a reactive approach to security. IronOrbit's expanded vCISO services ensure organizations have access to top-tier security leadership, helping them stay ahead of cyber threats while focusing on their core business objectives.
